

Questão de Prova de Programação Orientada a Objetos com Java

(Esta questão fez parte da Prova 1 da disciplina Programação III do semestre 2019/1)

Programas de pós-graduação (PPGs) reportam à CAPES anualmente sua produção bibliográfica. Dentre as principais produções reportadas por PPGs em Computação estão os artigos em conferências e os artigos em periódicos. Para artigos de conferência, os PPGs informam se são longos ou curtos, seu título, páginas inicial e final e nome da conferência. Para artigos de periódico, informam o título, páginas inicial e final e nome do periódico. Para avaliar a qualidade da produção dos PPGs, a CAPES associa a cada veículo (conferência ou periódico) um índice chamado Qualis, dentre os valores (do mais alto para o mais baixo) A1, A2, B1, B2, B3, B4, B5 e C.

Escreva um programa que receba na entrada padrão um número inteiro N, seguido de dados de N artigos publicados por um PPG em um determinado ano, incluindo a avaliação Qualis de cada artigo, e imprima as seguintes informações: (a) total de páginas produzidas pelo PPG; (b) média de páginas produzidas nas categorias: periódico, conferência longo e conferência curto; (c) quantidade de artigos em cada índice do Qualis, desconsiderando artigos curtos.

Ao efetuar cálculos com as páginas inicial e final de um artigo, seu programa deve tratar os seguintes casos de informações incorretas: a página final não pode ser menor que a inicial e o tamanho do artigo não pode passar de 50 páginas. Nestes casos, seu programa **NÃO** deve abortar, mas sim desconsiderar aquele artigo para fins de total e média de páginas, bem como imprimir uma mensagem informativa na tela: "Artigo <título> informa dados de paginas inicial-final incorretos: <inicial>-<final>", substituindo <título> pelo título do artigo e <inicial>-<final> pelas páginas inicial-final lidas. Crie uma exceção para lidar com estes casos.

Especificações

<i>Entrada:</i>	Um número N (inteiro), seguido de dados de N artigos, contendo cada um 5 linhas: o tipo de artigo, o título, páginas inicial e final (inteiros, separados por um traço), nome do veículo e Qualis. O tipo de artigo pode ser trabalhoCompletoEmCongresso (artigo de conferência, longo), resumoExpandidoEmCongresso (artigo de conferência, curto), resumoEmCongresso (artigo de conferência, curto) ou artigoEmPeriodico (artigo de periódico).
<i>Saída:</i>	Os seguintes dados, substituindo as lacunas por números (números reais formatados com 2 casas decimais): Total de paginas produzidas: ____ Media por tipo: curto ____ / longo ____ / periodico ____ Publicacoes por Qualis: __ x A1; __ x A2; __ x B1; __ x B2; __ x B3; __ x B4; __ x B5; __ x C;
<i>Exemplo de entrada:</i>	121 trabalhoCompletoEmCongresso A clustering search metaheuristic for the bi-objective flexible job shop scheduling problem 333-337 XLIV Latin American Computing Conference - CLEI B3 trabalhoCompletoEmCongresso A Domain-Specific Language for Fault Diagnosis in Electrical Submersible Pumps 2-10 2018 IEEE 16th International Conference on Industrial Informatics (INDIN)
